

Analytical Thinking & Problem Solving

IMPROVE YOUR ANALYTICAL THINKING AND PROBLEM SOLVING SKILLS

Jakarta, 29 – 30 Januari 2015
Jakarta, 12 – 13 Mei 2015
Jakarta, 16 – 17 September 2015

In today's organizations, it is everyone's job to effectively solve problems. And while thinking skills may seem natural, they're not necessarily intuitive, and they don't come easily to many people.

Analytical thinking and problem solving are foundational thinking skills that involve breaking things down into their component parts. They also involve deductive reasoning, drawing conclusions from givens and applying judgments to reach conclusions from a combination of evidence and assumptions.

We all solve problems on a daily basis, in academic situations, at work and in our day-to-day lives. Some of the problems that are typically faced include:

- Putting together an argument for a presentation.
- Dealing with an awkward customer.
- Thinking about how you are going to manage your departmental budget to keep you going until the end of term.
- Developing a strategy to reach the next level of your workplace performance.

This two-day training introduces you to fundamental thinking processes so that you can successfully analyze and solve a wide variety of business problems. Get these essential problem-solving skills now to give yourself a powerful competitive and career advantage.

COURSE OBJECTIVES

- Learn to describe the problem-solving process.
- Identify various problem-solving techniques and apply these in solving business problems.
- Understand thinking models to help in thinking outside-the-box and generate a larger solution space.
- Understand creativity and blocks to creativity.
- Arrive at objective, well-reasoned decisions in a reasonable time.
